

# WiseForm+

## Cold-Formed Blister Aluminum Desiccant Film (with WiseLid Seal Foil)

-  Strong moisture and oxygen resistance performance.
-  Effectively blocking water vapor, oxygen, and lights.
-  Prevent drugs from damping and extend shelf life.

### STANDARD STRUCTURE:

The desiccant layer is available in standard structures:

Moisture absorption capacity (25°C, RH60%) (g/m <sup>2</sup> \oz/yd <sup>2</sup> )	≥4.0\0.12	≥6.0\0.18	≥8.0\0.24
Water vapor transmission rate (38°C, RH90%) (g/(m <sup>2</sup> ·24h))	≤0.020	≤0.020	≤0.020
Oxygen transmission rate (23±2°C) (cm <sup>3</sup> /(m <sup>2</sup> ·24h·0.1Mpa))	≤0.015	≤0.015	≤0.015

WiseForm+ Cold-formed blister aluminum desiccant film is a new moisture-proof packaging solution developed by WiseSorbent for tablets, capsules, small instruments, and similar products. Building upon standard cold-formed blister packs, WiseForm+ integrates an additional layer of desiccant film. This desiccant film contains desiccant particles that not only effectively absorb moisture within the blister pack but also mitigate moisture diffusion at the edges of the blister, thereby enhancing the durability of the packaging. It provides comprehensive moisture protection for sensitive products, ensuring long-term stability and quality of the packaged products.

### WiseLid Seal Foil:

### Child-resistant Structure:

WiseForm+ is used in conjunction with WiseLid seal foil or child-resistant seal foil for a more secure seal. WiseForm+ and WiseLid are combined products, and currently, WiseForm+ standard products are not sold separately.
